

# Ask Me About

Week of 10/21

- To tell you about how I use “Sound Power” and “Picture Power” together to help me read!
- To show you how I can make up rhyming words! I know all rhyming words sound the same at the end.
- To explain how I write like a scientist! I got to use a magnifying glass to see the little details on either a leaf, a stick, a hornet’s nest or the flowers in the tower garden.

- To tell you about shapes! I can tell shapes apart by how many straight sides they have. Ask me how a circle is different.

- To show you how I can break apart a whole into 2 smaller parts. I know that 5 can be broken into 1 and 4 or 2 and 3.

**\*\*Reminder:** Our Halloween Costume Parade will be on Thurs. 10/31 @ 2:15 in the bus loop. We’d love some of you to come early and help put on costumes!

**\*We** will have a Halloween party in the classroom right after the parade. Thanks so much to the parents who helped organize it and decorate our room!!

**\*Thanks** to all of you for coming in for Parent Conferences. I am having so much fun teaching your children. It was nice to be able to share all they’ve done with you!!
